

Chamber Nation Search Engine Optimization Keyword Testing Document

Instructions: The numerical value is a category name typically found in a Chamber of Commerce member directory. The values under the category are terms used through Google to find the value in the category. Many of the associated keywords to each category should be added by the Member during the setup process of their Traffic Catcher System (TCS). Keywords will be used by the public to locate your members through search engine.

Please go to:

Locate your area from the directory and begin to test the keywords below. As members optimize, the Area Search Engine will become a valuable addition to anyone looking to do business in the area served by the Chamber of Commerce.

(Live Testing:
