### OPTIONAL MEMBER UPGRADE to CHAMBER SQUAD

If members optionally opt into the Chamber Squad ([www.ChamberSquad.com](http://www.ChamberSquad.com)) program they pay a one-time setup fee of \$49.95 for a wide-array of setup services including the consulting, labor, licensed imagery and support resources. They pay \$9.95 per month for on-going support and technology for their Traffic Catcher Page (TCS), Chamber Search Engine results, DisplayedRight display ad management & publishing system, mobile web app to showcase up to 100 ad displays. There are many more services provided with details presented at [www.ChamberSquad.com](http://www.ChamberSquad.com). This service is designed to help drive more prospects to members and improve their overall Chamber membership value.

### Chamber Squad Pledge:

- **We will** contact your member introducing ourselves as part of your Chamber's support team.
- **We will** discuss what they would like to see promoted successfully through their membership.
- **We will** make suggestions on how to proceed and begin the build out of their DisplayedRight system and new Mobile Web Application.
- **We will** provide additional consulting and phone support for complementary technologies like Facebook, Yelp, Foursquare for Business and Google's Get Your Business Online ("GYBO") website program.

This is a valuable service for those members who already have a website or not. Members without websites will now be provided with one along with a custom domain name and matching email address. Additional services like coupon management and publishing, press releases, multi-post to their existing social networks and more included. Members with websites will find that this service will improve prospect generation and add significant services to their current online presence.

**Chamber Agrees:**

To qualify for revenue share on this program the Chamber will allow Chamber Nation to create a Chamber Squad presentation page within the Chamber’s website for ordering service, link from homepage, banner at the bottom of TCS pages, small “upgrade to Chamber Squad” with link on footer of broadcast emails, banner in members area and link within the mobile application to properly convey this optional program to members. In addition you agree to promote the program via an advertisement in your normal member communications and send a broadcast message to all members announcing the program. This broadcast should also include a link to your new Chamber Squad page in your website. Once program is in place we may contact members to discuss their free Chamber Nation services and the optional upgrade to the Chamber Squad program.

Chamber Nation will provide a 25% revenue share on all monthly revenue earned from the Chamber Squad program. Members signup and pay online through the Chamber Squad system and a revenue share check will be sent to Chamber each quarter.

A wholesale model is ALSO available where Chambers would like to include this service in certain member plans so we would not bill the member. Since Chambers bill annually in advance, we bill the Chamber monthly, this is terrific for Chamber cash flow.

---

**Permission Granted:**

Your signature provides us with permission to integrate the Chamber Squad program into your current website and management system. In exchange we will provide revenue as described above back to the Chamber. A counter signed agreement will be returned for your files.
